CURRICULUM VITAE — NGUYEN VAN AN

Target Role: Senior Backend Serverless Engineer
Contact: an.nguyen.dev@example.com | (+84) 901-234-567 | Ho Chi Minh City, Vietnam
Portfolio & Code: https://github.com/nguyenvanan-mock | LinkedIn: linkedin.com/in/nguyenvanan-mock

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 3+ years of intensive experience architecting and developing serverless microservices on AWS using TypeScript and Node.js. Strong expertise in event-driven architectures, DynamoDB Single-Table Design, and high-throughput SQS pipelines. Passionate about clean code, automated testing, and cloud security best practices.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript (advanced), JavaScript (ES6+), Python (intermediate).
- **Backend Frameworks & Runtime:** Node.js (v18, v20), Express.js, Fastify.
- **AWS Cloud & Serverless:** AWS Lambda, Amazon API Gateway (HTTP/REST), Amazon DynamoDB, Amazon S3, Amazon SQS, Amazon SNS, Amazon CloudWatch, AWS Cognito.
- **Infrastructure as Code (IaC):** AWS CDK (TypeScript), AWS SAM.
- **Databases:** Amazon DynamoDB (Single-Table Design, GSIs, TTL, Streams), PostgreSQL, Redis.
- **Testing & Tools:** Vitest, Jest, Supertest, Git, Docker, Postman, GitHub Actions CI/CD.

PROFESSIONAL WORK EXPERIENCE

Senior Backend Engineer — CloudScale Solutions Vietnam
July 2023 – Present | Ho Chi Minh City

- Architected and implemented 15+ serverless REST microservices using AWS Lambda (Node.js 20, TypeScript) and API Gateway, serving 200,000+ daily active requests with sub-100ms response times.
- Designed single-table DynamoDB data models with GSIs for high-frequency queries, cutting database read costs by 42%.
- Built an asynchronous document processing pipeline utilizing S3 Presigned URLs, S3 Event Notifications, and SQS workers with dead-letter queues (DLQ), ensuring zero message loss during traffic spikes.
- Authored Infrastructure as Code using AWS CDK v2 in TypeScript, establishing reusable L3 constructs for standardized Lambda functions and IAM least-privilege roles.
- Implemented structured JSON logging with Correlation IDs across microservices for centralized CloudWatch observability.

Backend Developer — FinTech Innovations Co.
January 2021 – June 2023 | Ho Chi Minh City

- Developed core payment gateway integrations and transactional APIs using Node.js, TypeScript, and PostgreSQL.
- Configured automated CI/CD deployment pipelines using GitHub Actions, reducing deployment cycle time from 40 minutes to under 5 minutes.
- Maintained 90%+ unit and integration test coverage across all critical payment flows using Jest.

EDUCATION & CERTIFICATIONS

- **Bachelor of Science in Software Engineering** — University of Information Technology (VNU-HCM) | *GPA: 3.6 / 4.0 (2017 – 2021)*
- **AWS Certified Solutions Architect – Associate (SAA-C03)** — *Issued Dec 2023*
- **AWS Certified Developer – Associate (DVA-C02)** — *Issued Aug 2022*
